- **All Round Joystick:** Regular size joystick, regular force
- **Multi Joystick:** Smaller size joystick, limited force
- **Mirco Joystick:** Very small size joystick, minimal force

IDM-ALLROUND-9	All-Round Use	2 Jack Inputs for Switches
	Size: 4.55in. x 2.60in x 2.36in	
	Required Force: 250 grams	

Product Description

This fully proportional joystick with a standard amplitude and power requirement of 250 grams, has a compact housing of 4.55in. x 2.60in. x 2.36 in. (110mm x 66mm x 60mm), and 2 jack inputs for switches. This makes it possible to connect 1 or 2 "Satellite Twisters" directly to the joystick, allowing one for the power on/off function and one for a mode button.

In the housing of the joystick, an interface with sophisticated electronics is built-in. These electronics make the joystick adaptable to an individual's capabilities and needs.

Adjustment of the parameters can be made by using the free downloadable mo-Vis Configurator Software. To configure the joystick or for diagnostic purposes, the connection to the pc is made by a USB cable directly from the joystick to the computer (mini USB port). Multiple parameters can be selected and changed, depending on the profile selected, to best fit the clients' needs.

The All-Round Joystick is foreseen with 4 screw holes for direct mounting onto flat surfaces.

The Micro Joystick is compatible with the following Stealth joystick mountings:

- The Swing-Away SM660-M Series
- The Gatlin GAT400 Series
- The ARMS260 Series
- The Power Chin Boom

The joystick can be added to any existing mount and is very similar to Permobil's Compact Light Joystick. The All-Round Joystick, with its SUB D9 pin connector, is compatible with R-Net and Q-Logic connections.

Thanks to its design and possibilities the All-Round Joystick is a very comfortable solution for clients with disabilities, or for their attendants to drive a powered wheelchair with precision.

Please visit our website at www.stealthproducts.com to see more information about the mounting options available for the All-Round Joystick.

About mo-Vis

The mo-Vis line is exclusive to Stealth Products. mo-Vis stands for 'move with Vision', as we like to keep moving forward and get people 'on the move'! All mo-Vis products follow this vision. Not only are functionality, flexibility and ergonomics important, but they are accompanied by discretion and elegance as well.
