

## TWISTER

Stealth's mo-Vis Series Mechanical Normal Open Switch

Size: .67in (17mm)	Required Force: 30g (.067lbf)
Mechanical Normal Open Switch	
Twister Basic or Twister on Bent Tube	

## Product Description

The Twister switch is a single, mechanical, normal open switch. Simply plug the Twister into the 3.5mm female jack on a switch- adapted device joystick. Twisters can be mounted onto the mo-Vis Multi or All-Round joysticks, onto the interface of the Micro joystick, or computer (for computers you need a switch interface). To activate the Twister, simply press anywhere on the top of the activation surface. You will feel and hear a clear and audible "click".

The Twister is available in three different styles:

### Twister on Bent Tube

This Twister switch is attached to a mo-Vis Quick-to- Mount bent tube of 3.94in. (100mm) and 0.24in. (6mm) in diameter. A Quick-to-Mount Clamp is included to enable attaching your Twister to any other 6mm mounting rod. The distances and angles in which the Twister is mounted can be adjusted by tightening or loosening the Q2M Clamps via the Allen screws. Twister on Bent Tube is compatible for mounting on all of the mo-Vis Joysticks and exists in a short cable version of 11.81in (300mm) or a long cable version of 59.05in. (1500mm).

### Twister Basic

This Twister Basic is mounted on a plate of metal/plastic with 2 screws and is designed to mount in a wheelchair tray. It has a long cable of 59.05in. (1500mm) and is delivered with 2 screws. The Twister basic is also compatible with all of the mo-Vis joysticks.

### Satellite Twister

Satellite Twisters are only compatible with the All-Round Joystick. The All-Round joystick features two covers that hide ports for the joystick to mount onto. By removing the covers and sliding the switches into the port and securing, the client now has full access to switch modes and/or power the chair on or off.

All Twister switches are available in 5 colors: Yellow, Green, Red, Blue, and Black.

## About mo-Vis

The mo-Vis line is exclusive to Stealth Products. mo-Vis stands for 'move with Vision', as we like to keep moving forward and get people 'on the move'! All mo-Vis products follow this vision. Not only are functionality, flexibility and ergonomics important, but they are accompanied by discretion and elegance as well.
