Power Button

"**I**" = "ON"
"**O**" = "OFF"

"Fuel Gauge" Charge Indicator

LEDs	CHARGE
1	25%
2	50%
3	75%
4	100%

Charging the Power Bank

1. Connect the AC/DC charger to the power outlet.
2. Connect the Power Bank to the AC/DC charger.
3. Turn on the Power Bank. *(Unit will not charge with the Power Button in the OFF position)*
4. The LED on the AC/DC charger will glow RED while the charging cycle is active.
5. The LED indicator will change to GREEN when the Power Bank has been charged to 95% or higher. *(LED will also glow GREEN if the Power Bank is not turned on. Press the switch into the "I" position to start the charging cycle.)*
6. Turn the Power Bank OFF when charging is complete or when not in use to conserve charge.

P91D469R2

Full Charge Time (Hours) = Battery Capacity (Amp Hours) ÷ Charger Current (Amps)
