Coolcore® is a research proven performance fabric technology that adapts to its environment and regulates temperature by managing heat and moisture. The proprietary construction helps manage and distribute moisture quickly throughout the fabric to enhance the evaporation and drying time.

Air Flow Mesh is equipped with fine pores that provide superior air circulation. It can improve positioning if a client is prone to sliding on other cushion cover materials. This fabric is ideal for those in hot or humid environments.

Stealth-Tek is a nylon/polyester fabric coated with polyurethane. These types of fabrics are waterproof with stretch capability and applications in medical and healthcare.
